

1/30/2012

Dear Parents and Neighbors of PS 29:

The New York City School Construction Authority (SCA) wishes to advise you that a construction project is slated for the school. The work includes Exterior Masonry, Roof and Cornice Replacement.

. The work includes Exterior Masonry, Roof Replacement, Parapet Replacement and Flood Elimination.

The work will begin in a few months and the expected completion date is August, 2013.

The work may require asbestos removal. This material does not easily create airborne fibers or pose potential fiber exposure to surrounding occupants. The workers who are in actual contact with the material will be wearing protective suits and respirators and there will be containment of these materials.

The removal work is being performed by a licensed abatement contractor and managed by an environmental consulting firm. Representatives of the environmental consulting firm are on site for the duration of the abatement to ensure the contractor adheres to all proper regulations. The consultant also monitors the air in the immediate area to ensure that the removal is taking place properly. Test results are made available at the school to all interested parties.

The General Contractor will be working with the required Department of Buildings permit. So as not to interfere with the learning environment during the school year, work will take place after school hours into the late evening, on weekends and school holidays.

During the summer, weather permitting, most construction work will take place on weekdays during daytime hours.

Although this renovation work will inevitably cause noise, the SCA will strive to minimize the disruptions to you and your neighbors.

We apologize for any inconvenience and will attempt to complete the work with as minimal disruption to the community as is possible.

If you have any questions or need further information, please call me at (718) 472-8199.

Sincerely,

Yvette Knight
